Data Science

Database: Firebase, MySQL

Toolbox: Linux, Git, Firebase, OpenCV, Excel, Matlab, Software Development

Soft Skills

Mold-able | Curious | Effective
Problem-Solver | Researcher

Areas of Interest

Data Analysis & Visualization

Mobile Applications

Entrepreneurship | Digital Marketing

Blockchain | SEO

Projects

March 2020	**HotelLo - Hotel Booking Android App** A simple android app allowing its users to search and book available hotels of their choice. Added an extra unique feature of query raising and resolution. Easy and quick responses to any particular complaint or service request raised by a guest during the stay, without manually contacting the hotel staff(using the app only).	Self Project
2019 – 2020	**DDXR - Events Ticketing and Check-In App** (To be launched soon) A native android app for event ticketing and event check-in. This app is focussed towards creating a student community and thus connecting the organizers' with the students' community. And making the events reach their target students effectively.	Self Project
